Hi Charmaine,

One more item for the agenda. It's going to be a full meeting!

Catherine

Dear Dr. Paquet,

Hope this message finds you well. My colleagues and I are submitting a grant application to the Stem Cell Network on April 1st. The topic revolves around cell and gene therapy and on the responsible pathways in paediatrics. More specifically, our project – led by Prof. Vardit Ravitsky - explores ways to facilitate the responsible clinical translation of cell and gene therapies for the benefit of children, by addressing knowledge gaps and developing resources for researchers, clinicians, families, REBs, policymakers and regulators.

I'm writing to ask if it would be possible to receive a letter of support from CAREB. As you can see from the attached 1-page summary, one of the stakeholders of our project are the Research Ethics Boards. One of our main goals will be to develop training and educational resources for regulators, researchers, and REBs, to facilitate approvals and clinical translation. This is where we think CAREB could play a critical role as the most important organization regrouping REB professionals in the country.

If this is of interest, please find enclosed a draft letter of support. We have suggested some language for your consideration, but feel free to make any necessary changes. We are compiling all letters of support for the 23rd of March. If you have any questions, please do not hesitate to contact me. You will see an out of office notice, but I will be available to answer any questions.

Many thanks for your time.

Ma'n
